

Advanced Prompting Techniques

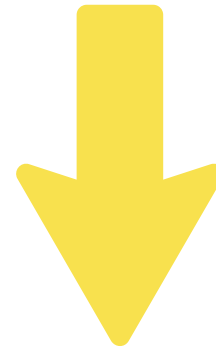

Advanced Prompting

1. Create an identity
2. Define a clear task
3. Provide context
4. Specify your output style
5. Iterate

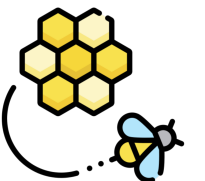

Create an Identity

I want you to act as....

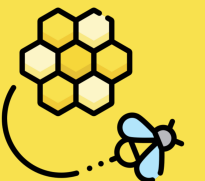

Define the perspective
the AI should have.

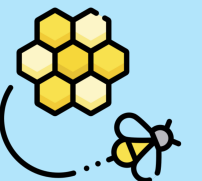

Define a Clear Task

Use action verbs
explicitly state the
task at hand.

Provide Context

Provide background information on the task and how you want the response structured.

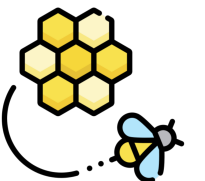

Specify Output Style

Define the style and flair of your output. This includes options like tone, temperature, and the presence penalty.

Temperature

An input into ChatGPT's model that defines the randomness of its response. A temperature of 1 is most random and 0 is least random.

Presence Penalty

An input into ChatGPT's model that penalizes repeated words or phrases. The higher the presence penalty, the less repetition in the response.
